

# SIILK ECM

 **beaumed**<sup>®</sup>  
ELASTIN FOCUSED  
Skin Treatment

Novel amino acids formula  
Consists of HA, Amino Acids & Minerals  
Stimulates fibroblasts  
Re-constructing skin Extra Cellular Matrix  
Biosynthesis of collagen & elastin  
Long lasting formula of HA  
Bio-revitaliser & Hydration

## ABOUT ECM

## BENEFIT

Anti Aging properties  
Improves skin elasticity & texture  
Maintain moisture  
Lines & fine wrinkles reduction  
Reduces scars & acne scars  
Stretchmarks improvement  
Bright & smooth appearance

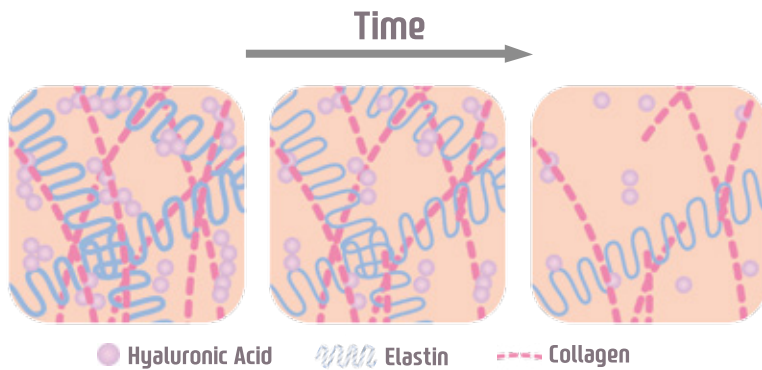

Face, Neck, Decolletage, Hands, Body  
Skin aging, premature aging, dryness  
Sun damage, wrinkles, scars, blemishes  
1 cycle of 4 treatments every week  
Repeat cycle for skin maintenance  
Medium – Deep dermis application  
Manual, MTS, roller, injector

## APPLICATION

# Extra Cellular MATRIX

Extra Cellular Matrix (ECM) consists of Collagen, HA, Elastin, Glycoproteins, etc., which provides structural & biochemical properties to support and maintains normal physiologic properties of the skin.

## COLLAGEN

Provides structural support to the skin, gives firmness and anchor cells to each other.

## HYALURONIC ACID (HA)

Bonds to collagen on one side, and link to water molecules, give the skin plumpiness & bouncy.

## ELASTIN

Provides elasticity, allowing tissue to stretch when needed and return to its original state.

## GLYCOPROTEIN

Attached to the cell's surface, allowing growth factors & others to regenerate the skin.

## WHAT HAPPEN if ECM Changes?

As we age, our skin ECM will decrease and lost its vitality. It will cause visible signs of aging, such as volume loss, dehydrated, wrinkles, dull & dryness, uneven texture, lack of moisture & elasticity, and cells degeneration.

# SIILK ECM

## COMPOSITION

Amino Acids, Hyaluronic Acid, Minerals & Cooper

## PACKAGE

3.3ml x 5vials

+82-(0)10-6365-3328
