PDNA

— PDNA —
haPN 20&70

Restore & Cure your Skin!

• PDNA • Hyaluronic Acid • Glutathione

PDNA (PolyNucleotide)

- ❖ HaPN PDNA made from a substance of a biological molecule base : Poly Nucleotide.
- ❖ The base ingredient is derived from Salmon DNA, that is almost identical thus very compatible to human DNA.
- ❖ The form of PDNA is very stable in heat, made by high purification process. It is safe and no harmful effect related to foreign action to the body.
- ❖ PDNA is proven to give various effective improvement results to human skin.
- ❖ PDNA combines with cell receptors in the skin to restore damaged skin cells and tissue by creating micro blood vessels in the damage area.
- ❖ Skin cells also get stimulated during the healing process, releases Fibroblasts to produce new Collagen and promotes skin regeneration.

haPN 20

haPN20 contains PDNA, designed to mainly provide a great bunch of Hydration and promotes skin curing.

Action of haPN20

DNA
Synthesis

Cell growth
stimulation

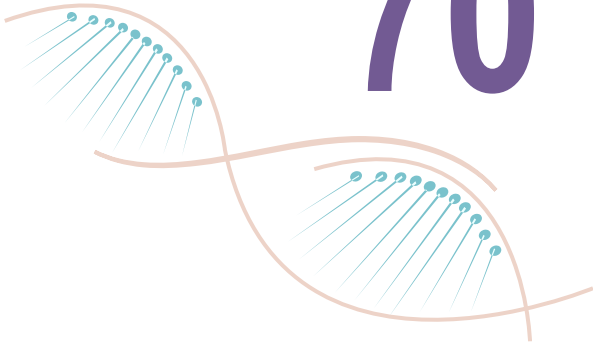

A2 receptor
stimulation

Cell proliferation
(Fibroblast, Osteoblast)

Tissue repair
(Microcirculation improve)

haPN 70

haPN70 contains triple combination of PDNA, HA, and Glutathione, targeting troubled skin such as scars / acne scars, uneven skin tone, lines & wrinkles, damages skin, stretchmarks, and skin blemishes with hyperpigmentation.

GLUTATHIONE – Whitening Effect

Glutathione is a vital substance in our body, composed of amino acids, which takes role of strong anti - oxidant and remarkable anti - aging properties. Glutathione converts eumelanin to phaeomelanin (lighter) pigment color, and helps to inhibit and deactivates tyrosinase, enzyme that produces pigment. Its antimelanogenic properties has led to skin lightening promotion effect.

Glutathione has widely used and proven to be safe in any available forms.

haPN20

TARGET

Early age, skin curing & prevention
Dehydrated skin

BENEFITS

Strong hydration & moisture
Skin curing & restructuring
Mild scars & acne scars
Lines & wrinkles improvement
Stretchmarks
Skin tone & texture
Good for maintenance 2-3 times a year

haPN70

TARGET

Any age, skin curing
troubled - damaged skin

BENEFITS

Skin curing & restructuring
Hydration & moisture
Moderate to deep scars & acne scars
Lines & wrinkles improvement
Stretchmarks
Skin tone & texture
Whitening solution

haPN70

COMPOSITION

PDNA (PolyNucleotide) 3mg/ml
HA (Hyaluronic Acid) 4mg/ml
Glutathione 2mg/ml

PACKAGE

3ml x 5vials

INDICATION & PROTOCOL

haPN70 can be used on all face, neck, and body area.
Delivered onto Basal Epidermis or Dermis layer.
Can be delivered manually, or using Derma Roller, MTS, or any injector device.

RECOMMENDED SESSION

1-2 vials per treatment area (or necessary protocol according to the needs).
2-3 weeks interval.
At least 3-4 intensive treatment for better result.

CAUTION

Store in cool room temperature.
Once opened, use it immediately.
In the case of any side effects presence, stop usage and contact your dermatologist immediately.

haPN20

COMPOSITION

PDNA (PolyNucleotide) 2mg/ml

PACKAGE

1ml x 1syringe

INDICATION & PROTOCOL

haPN20 can be used on all face, neck, and body area.
Delivered onto Dermis layer.
Can be delivered manually, or using Derma Roller, MTS, or any injector device.

RECOMMENDED SESSION

1-2 syringes per treatment area (or necessary protocol according to the needs).
2-3 weeks interval.
At least 3-4 intensive treatment for better result.
Maintenance 2 times / year.

CAUTION

Store in cool room temperature.
Once opened, use it immediately.
In the case of any side effects presence, stop usage and contact your dermatologist immediately.
